## OUR VISION

Embraces our core values of Integrity, Team work and Equal opportunity. Our courses are professional qualifications and encourage our students in achieving their highest potential through high quality support. To have graduated from the London College of Business and Finance, is an achievement to be proud of.

## OUR MISSION

Is to educate the business leaders of tomorrow by developing the skills and providing the knowledge necessary to make an impact in the competitive global market place, mould future executives who can carve their own niche in the difficult-to-survive corporate world, thereby designing their own destiny.

## OUR QUALITY POLICY

Quality speaks a Universal Language". Quality travels. It speaks for itself. Across the boundaries which separate human existence and segments of thinking, quality becomes the yardstick to differentiate between originality and mere imitation. It transfigures mediocre into the best and the best to something even better. It is the sheer love for producing quality work that inspires us to continuously come up with original ideas to serve extraordinary purposes. After all, quality speaks a language that is easy to understand by one and all.

London College - India is one of the elite business schools in India. We shape business practices and transform careers across the globe. Our academic strength drives original and provocative business thinking, empowering our people to challenge conventional wisdom in a truly unique academic environment.

Our faculty focuses on the global context of management, and we train leaders for an international economy.

Through our innovative teaching methodologies, we bring out the best in every student, keeping Quality at the centre of all our practices.

## ABOUT LONDON COLLEGE THE CENTRE OF EXCELLENCE

London College – India is a globally reputed educational institution offering students from across the world, high quality education at an affordable cost. # B.COMIN | SCM

# LOGISTICS & SUPPLY CHAIN MANAGEMENT

## WHAT IS LOGISTICS & SUPPLY CHAIN MANAGEMENT?

At the most fundamental level, supply chain management (SCM) is management of the flow of goods, data, and finances related to a product or service, from the procurement of raw materials to the delivery of the product at its final destination. Although many people equate the supply chain with logistics, logistics is actually just one component of the supply chain. Today's digitally based SCM systems include material handling and software for all parties involved in product or service creation, order fulfilment, and information tracking such as suppliers, manufacturers, wholesalers, transportation and logistics providers, and retailers.

Supply chain activities span procurement, product lifecycle management, supply chain planning (including inventory planning and the maintenance of enterprise assets and production lines), logistics (including transportation and fleet management), and order management. SCM can also extend to the activities around global trade, such as the management of global suppliers and multinational production processes.

In the past few years, disruptions have rocked the global supply chain. Increased demand for delivered goods challenged manufacturing centers' abilities to keep up. Restrictions slowed transit and worker shortages caused deliveries to back up in ports.

These disruptions made the mainstream news and brought the term "supply chain" to an inconvenienced general public. Businesses realized how much their bottom lines depended on skilled supply chain management, and professionals began to see the value in developing supply chain skills.

Supply chain includes all the steps necessary to deliver a final product to the customer. End-to-end, it includes:

- **Procurement:** Selection and sourcing of raw materials
- **Inbound logistics:** Delivery of materials to manufacturers
- **Warehousing and inventory management:** Minimizing delays in materials and product storage
- **Outbound logistics:** Transporting manufactured products to distributors, retailers, and ultimately customers
- **Forecasting:** Evaluating customer responses and predicting demand, with the goal of managing inventory levels correctly.
- **Impacts of a supply chain crisis:** A delay at one touchpoint can cause multiple disruptions downstream, even circling back to interrupt early supply chain stages in the next production cycle.

## WHY CHOOSE TO STUDY SUPPLY CHAIN MANAGEMENT?

2020 year impacted supply chain education in ways that appear likely to endure even after the pandemic subsides. The interest in supply chain programs across the globe is growing, one positive by-product of the degree to which the subject of supply chains captured headlines during the past year. More students - and as important, their parents - now know what a supply chain is. Supply chain doesn't have a history like accounting or finance. The pandemic has changed that and programs are noticing an uptick in interest. The value of strong supply chains has also become apparent to students in a wide range of disciplines including business, medicine, public health, and science and engineering.

**So if you're looking to advance your career, your business, or just your understanding of how commerce works, studying supply chain can help you achieve your goals.**

## B.COM IN LOGISTICS & SUPPLY CHAIN MANAGEMENT

A B.COM-LSCM degree helps you establish a fundamental understanding in the working of Logistics & Supply Chain Management and how various aspects of it apply to the real world. It's a well- rounded degree currently in high demand because it's so versatile. Not only can you strengthen the skills you'll need to succeed in the business world - like communication and leadership - with this degree, but you can also prepare yourself to work in dozens of other industries which are the major integral part of SCM.

Here at KBP College in Academic Collaboration with London College, India, we have created B.COM-LSCM, a multi-disciplinary program that doesn't just focus on business administration. Instead, it allows you to specialize in the fields of Supply Chain Management, Logistics Management, Shipping Management, Aviation Management, Warehouse Management, Export-Import Management & Retail Management making you best equipped to work in these industries. This is a Mumbai University-approved 3 years full-time program and can upgrade to 4th Year for B.COM-LSCM (Hons)

B.COM-LSCM is a Choice-Based Credit and Semester System (CBCSS) with a grading system. Students who enroll for B.COM-LSCM undergo Industrial Interactive Skill-based training. The mission of the program is to develop young B.COM-LSCM aspirants into Skilled Professional Executives who can contribute to the growth of Logistics & Supply Chain industry in India and across the globe. We create astute leaders who can efficiently and effectively manage business amidst environmental turbulences.

We nurture entrepreneurial skills among the young generation to our career and make them effective change agents, to contribute towards better management practices for the country and the world by offering quality Integrated Skill Management Education.

Futuristic India & the World itself are in search of such skilled professionals and that is what we exactly deliver.
